**Pfannenber Announces New Partnership with GMN**

*Liquid Cooling solutions to be sold alongside spindle motors for streamlined experience*

**Lancaster, NY** – [Pfannenber, Inc.](http://Pfannenber, Inc.), a leading global manufacturer of thermal management, liquid cooling and signaling technologies, announces its partnership with GMN USA, a supplier of machine tool spindles, drives, lubricators, and cord sets. This collaboration will supply GMN USA with Pfannenber’s chillers, a liquid cooling solution that will be sold as a companion product alongside GMN’s spindle motors.

*“I am excited to partner with GMN. Our teams working together will bring new growth to both organizations,” commented Barb Ross, Director of Channel and Representatives at Pfannenber.*

*“It is an ideal combination of GMN’s high speed spindle technology with Pfannenber coolant chillers,” says James Wong, Director for Global NEMA Product Management at Pfannenber. “Our chillers will regulate and maintain the temperature of the spindles to increase reliability and reduce downtime for the end user.”*

*“GMN prides itself on partnering with high quality suppliers. We are looking forward to a great partnership with Pfannenber. And look forward to growing together in the US.” Commented Glenn R Ledoux Vice President of Sales, GMN USA.*

This alliance aims to better serve the machine tool industry in the US by featuring complementary products in one place. GMN USA offers a wide range of spindle support equipment in addition to Pfannenber’s coolant chillers including oil/air lubricators, spindle drives, assemblies, and other accessories. GMN engineers provide support for both new and retrofit spindle applications based on individual customer needs.

###

**About Pfannenber**

Pfannenber, Inc. is recognized as a leading global manufacturer of Thermal Management, Liquid Cooling and Signaling Technologies. In 1958 we invented the Filterfan®, which continues to be recognized worldwide as a leading product to help manage the temperature in electrical enclosures. Our business philosophy: Protecting People, Machines, and the Environment.

**About GMN USA**

GMN USA is a subsidiary of GMN Paul Mueller GmbH & Co. KG in Germany, a supplier of machine tool spindles, high precision ball bearings, clutches & seals. GMN USA provides machine tool spindle sales and services for the North American market including a wide range of spindle support equipment such as oil/air lubricators, coolant chillers, spindle drives, cable assemblies, and other accessories.
